

GDPR-FIRST NO API-CALLS 100% PRIVATE

We're building a future
where AI is safe, private,
and built on trust.

Fully compliant.
Future-proof.
From day one.

www.northatlantic.fi

Europe deserves its own secure AI.
Built in Europe. Built for trust.

North Atlantic is a Finnish-born AI company building secure, sovereign infrastructure for the next generation of European intelligence. With our headquarters in Finland and a growing presence through our UK subsidiary, we're designing privacy-first AI frameworks for regulated industries - healthcare, education, government and beyond.

North Atlantic

GDPR-FIRST NO API-CALLS 100% PRIVATE

WHAT WE DO

AI solutions from the ground up for Europe's most regulated, high-stakes sectors.
Private by design, compliant from day one - and owned entirely by you.

FOR EUROPE

Built for healthcare, education, public sector and other high-compliance environments where privacy, sovereignty, and reliability are non-negotiable.

Seamless enough for everyday business. Powerful enough for the most demanding use cases.

WHY CHOOSE US?

- ▶ **Privacy-first, always.** No tracking, no data sharing, no API dependencies. What happens in your system stays there.
- ▶ **Sovereign by design.** Everything we build is made to comply with the EU AI Act, GDPR, and national regulations.
- ▶ **End-to-end support.** From ideation to deployment and beyond. One partner, full ownership, no compromises.

CORE OFFERINGS

BESPOKE AI DEVELOPMENT

Custom solutions tailored to regulated industries. Built from the ground up with compliance, privacy, and performance in mind.

RAG BOT

Proprietary Retrieval-Augmented Generation framework. Blazing-fast, fully private, and self-hosted. Designed for enterprise use without external API dependencies.

PROPRIETARY LLMS

We deploy private language models for clients who need full control over their data. No external APIs, no dependencies - just secure, self-hosted intelligence built for critical use cases.

VOICD

Our next-generation voice AI stack. Call automation, smart assistants, voice-to-insight engines - all GDPR-first, fully self-hosted.
